Air Methods, DBA, Air Idaho Rescue, will be returning to Yellowstone Airport (WYS) to provide air ambulance services for the Town of West Yellowstone and the surrounding community. Air Methods has been operating at WYS seasonally, initially in 2014, and then year-round after the completion of their new hangar facility.

Due to the impacts of the COVID-19 Pandemic, Air Methods had to reduce and remove its winter operations this past season. The airport and Air Methods are pleased to see the return of this vital service.
